

Dear &&OWNERFN,

&&PTNAME presented to us for XXX

Diagnostic tests performed:

Working diagnosis:

&&PTCAP/He/She/It has been treated for XXX

Fluids:

&&PTNAME has been treated with intravenous fluids. It is common to expect increased thirst and urination for 24-48 hours after discontinuing fluids as the kidneys readjust. When we remove an intravenous catheter where fluids have been connected, we apply a temporary bandage to prevent bleeding. If &&PTNAME has any temporary bandages where the intravenous catheter has been removed, these can should be removed after 1 hour from discharge home.

Medications:

&&PTNAME will require ongoing medicating at home with:

XXX

Exercise

Please keep &&PTNAME quiet for the next XXX days with lead walks to the toilet only.

Afterwards you can gradually increase exercise.

No exercise (kept indoor only and quiet) for the next XXX days until &&PT/he/she/it is rechecked.

&&PTNAME can be exercised as normal

Diet

Please offer &&PTNAME a bland diet which will be easier to digest than normal pet food

A bland diet can be any of the following:

- mixture of cooked white rice and boiled chicken (skin removed)
- prescription food available from us or your regular veterinarian such as Hills I/D
- mixture of cooked white rice and boiled minced beef (remove fat)

Feed small amounts of the bland diet every 3-4 hours initially.

If &&PTNAME continues to do well, you can slowly increase the amount fed and decrease the number of feedings back to &&PT/his/her/its regular schedule.

Continue with only the bland diet for 1-2 days beyond resolution of problems.

&&PTNAME's regular diet can then gradually be added back in over 2-3 days until &&PT/he/she/it has completely returned to &&PT/his/her/its usual diet

Please feed &&PTNAME &&PT/his/her/its regular diet

Other monitoring:

XXX

Follow-up

Please take &&PTNAME to your regular primary care vet in XXX days for a re-check.

If &&PTNAME is showing signs of illness or if you have any concerns, please contact our staff at AREC or your regular veterinarian if in their opening hours.

If you have any questions please do not hesitate to call.

Thank you for trusting &&PTNAME to our care. &&PTCAP/He/She/It is very sweet and has been a pleasure to look after.

I wish you all the best.

Kind regards,

&&DVMATTFORMAL
